ZLT X21

Thank you for choosing our 5G wireless data terminal products. Please read this manual carefully and keep it for backup after reading it. ZLT X21 is a high-performance 5G indoor data terminal that supports NR(SA), converts cellular network data into Wi-Fi and wired network port data, supports 4 gigabit LAN ports, and supports 2.4G+5G dual-band Wi-Fi hotspot (AP). It is suitable for home or business scenarios that require rapid deployment of communication networks and Wi-Fi hotspots.

Main technical indicators of products

- Operating temperature : 0℃~40℃
- Relative humidity :5%~95%
- Power: input AC 100 V~240 V,50Hz~60 Hz Output DC 12V/2A.
- Size:117 mm *117mm *180mm
- Weight: 580g
- Uplink and downlink peak rate: 5G DL 2Gbps, UL 1Gbps (Theoretical value and actual rate are subject to operator configuration)

1.Preparation

1.Valid SIM card

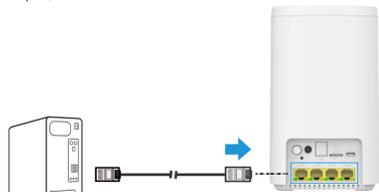

This device is suitable for Micro-SIM card only.

2.Check the device label to get the defaulted information (the picture below is only for the reference)

1

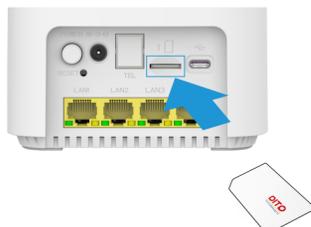

2.Use the RJ45 standard network cable to connect to the computer through the LAN port, and then access the Internet

5

2.SIM card insertion

Align with and insert the micro-SIM card flatly to the card slot. Otherwise it could be failed to insert smoothly.

2

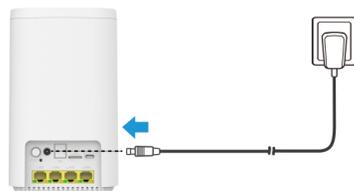

5.Device settings

1.You can view or modify device Settings by logging in to the device website.
 *Check the device label to obtain the IP address, user name, and password of the default device management website
 *Open a browser on the PC, input the IP address of the device management website to click in. (You are advised to use either of the following browsers to log in to the device configuration page. For example:IE 7.0•Firefox 3.0•Safari 4.0•Opera10.0•Chrome10.0 or better version)
 *Enter the user name and password and click "Login".
 *On the device configuration management page, you can change the SSID, WiFi password, and other information.
 *You can also change the password on the system Settings page.

6

3.Adaptor

Connect the adaptor to the external power supply, then connect to your device. Press the power switch, your device will power on and automatically connect to the Internet

3

6.WPS function

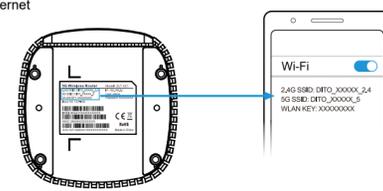

1.Long press the WPS button for three seconds and the WiFi light flashes to enter the WPS mode.
 2.Enable WPS on your mobile device (remark: only available on the mobile devices with WPS function.)
 3.Follow the system prompts on the mobile device to establish a connection with the device
 4.WPS is automatically turned off after two minutes.

7

4.Access to the internet

1.Check the defaulted information on the device label to obtain the SSID and WiFi. Select the correct SSID and input the correct WLAN KEY as wifi password on your mobile device to connect to WiFi and then access the Internet

4

7.Indicators and interfaces

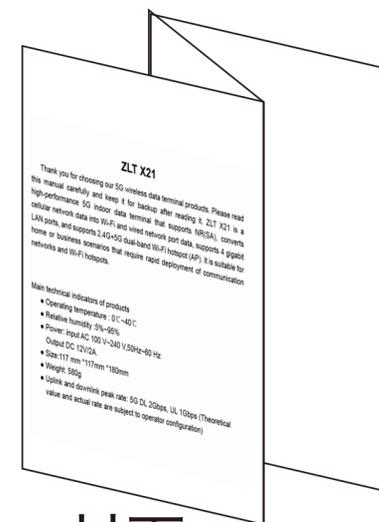

- 1.Power LED light on: the device operates.
 light off: the device closes.
 2.WiFi light on continually: Working properly

8

Technical requirement:
 finished size: 105*148mm
 unfold size: 525*148mm; tolerance: +/-1mm
 material: 80g book paper
 color: single black printing on the front and back
 folding pattern: zigzag folding
 the red dotted line is the folding line, no need to print it

技术要求
 成品尺寸：105*148mm；
 展开尺寸：525*148mm；公差：+/-1mm
 材质：80g书纸
 颜色：正反两面单黑印刷
 折叠方式：风琴折
 红色虚线为折叠线不用印刷

- light flashes: WPS function starts
 light off: WiFi or power off
 The light is usually off.
 3.4G (LTE) indicator
 4.5G (NR) indicator light on: 5G internet mode on(5G only)
 light off: 5G internet mode off
 5.Signal value indicator Red: poor
 Yellow: normal
 Green: good
 6.Power button press: Power on
 up-spring: power off
 connect the external power supply.
 7.Adapter interface
 8.SIM card slot Align with and insert the SIM card flatly to the slot.
 9.Type-c interface To download the software. Please do not use this port at will
 10.Reset button long press for 7 seconds to restore to factory settings.

9

card at will to avoid damaging the SIM card

10.Cleaning & Maintenance

- 1.Before cleaning the device, please turn off the device and use an anti-static cloth to clean the device. Do not use chemical or abrasive cleaners, since these may damage the plastic shell
 2.The operating temperature of the device is 0 ° C - 40 ° C
 3.Avoid using the device during thunderstorms and remove the power adapter from the socket.

14

- 11.LAN port Able to connect to the Wide Area Network
 12.WPS button: long press it to connect the wifi without encryption.

The device can be used for SA network mode(5G) for philippines

11.Description of the content status of harmful

substances in the product
 1. Name and content of toxic and harmful substances or elements in the product

Part Name	Toxic, harmful substances or elements					
	Pb	Hg	Cd	Cr (VI)	PBB	PBDE
Body shell	O	O	O	O	O	O
Alloy components inside body	O	O	O	O	O	O
Cable and components	X	O	O	O	O	O

15

8.Internet Related Problems

- 1.Possible problems
 Unable to access to the internet
 solution:
 ①Check your equipment Settings
 ②Wait 2 - 3 minutes until the device initialization is complete
 ③Check whether a valid SIM card is inserted
 ④Check the signal indicator.
 low speed of network
 solution:
 ①Check the strength of signal
 ②Check the network mode
 Unable to access to the device management website
 solution:
 ①Check the device label and use the correct IP address

PCB	X	O	O	O	O	O
Power adapter	X	O	O	O	O	O
Antenna	O	O	O	O	O	O

The O: indicates that the content of the toxic and harmful substances in all homogeneous materials of the component is below the limit specified in the SJ/T11363-2006 standard.
 The X: indicates that the content of the toxic and harmful substance in at least one homogeneous material of the component exceeds the limit specified in the SJ/T11363-2006 standard.
 Note: the components of this product containing toxic substances or elements cannot be completely replaced by toxic and harmful substances or elements due to the global level of technological development, but toxic and harmful substances only occupy the extremely small content of this product. And in line with the National Electronic Information products pollution control measures long-term use will not harm the human body, please feel free to use.
 Product implementation standard: YD/T2583.14-2013; YD/T2583.18-2019; GB4943.1-2011;

16

- ②Set your computer's network configuration as "automatically obtain an IP address"
 2.Other problems
 1.If the signal indicator is off or red, it indicates that the signal is poorly received. Move the device to a nearby window or another open place
 2.Incorrect password: After you change the password and forget the password, hold down the seven-second reset button to restore the device to factory Settings

12

12.Warranty and Commitment

Dear Customer:
 We promise to carry out a one-year quality guarantee for this product. The warranty card should be properly kept by the user. If lost, it will not be replaced. In case of failure of the product caused by non-human reasons, the user can go to the designated repair point for free within the warranty period with the warranty card and the purchase invoice marked with the product number.
 If the warranty card does not match the serial number of the product, the warranty card has been altered, or the product is not within the scope of the free warranty but can be repaired, the company can provide paid maintenance services.
